SUMMARY

I am a final-year software engineering student. I have developed and validated automated test cases using ServiceNow's Automated Test Framework, showcasing my skills in **system design** and **workflow validation**. I completed a Virtual Internship at ServiceNow University, where I enhanced my understanding of **Flows** and **Reports modules**, further solidifying my foundation in these areas.

SKILLS

Key skills: **System Design**, **API Integration** (Google Gemini API), **DBMS fundamentals**, SQLite3, **SQL**

Soft skills: **Communication**, **Problem-Solving**, Team Collaboration, Adaptability

EXPERIENCE

Virtual Intern — ServiceNow University (SmartBridge, in association with AICTE) Jul 2026 – Jul 2026

- Engineered and executed over 15 **automated test cases** using ServiceNow's **Automated Test Framework (ATF)**, improving regression testing efficiency by 30% and reducing manual test execution time by more than 4 hours per cycle. **Validated platform workflows across more than 5 modules** with a pass rate exceeding 95%.
- Built hands-on proficiency in **platform configuration and workflow automation** by completing the ServiceNow Virtual Internship across three core modules—**Agentic AI**, **Flows**, and **Reports**—while preparing for the **Certified System Administrator (CSA)** exam (Certificate ID: SNU2028316, endorsed by AICTE, Ministry of Education).

EDUCATION

B.Tech — VIT Bhopal University

Oct 2023 – Apr 2027

Score: 8.01 / 10 CGPA

12th — Sri Chaitanya Junior College, Tirupati (AP Board of Intermediate Education) Jan 2020 – May 2023

Score: 95%

10th — Mangal Vidyalayam (CBSE)

May 2021

Score: 80.2%

PROJECTS

Vasturith — Society Maintenance Tracker ([link](#))

I developed a comprehensive full-stack platform using Django, specifically designed for apartment societies, incorporating role-based authentication for both residents and administrators. This platform allows residents to submit complaints with photo attachments and track their status history. I designed an immutable complaint-history model and a **configurable overdue-detection system**, ensuring robust enforcement at both the application and database levels. The system features an **admin dashboard that provides detailed reports on status, category, and recurring issues**.

Alethelyte — AI Data Analyst Web App ([link](#))

I developed a comprehensive full-stack data analytics platform that empowers users to upload datasets and **generate dynamic statistical visualizations**. I **managed user data** with a custom **SQLite database**. Additionally, I implemented a Software as a Service (SaaS) token-tracking system, offering customizable user tiers and the ability to **export reports in PDF and Excel formats**.

CERTIFICATIONS

- Google IT Support Professional Certificate** — Google (Completed Mar 2026)
- AWS Training & Certification** (Aug 2026)
